VoiceThread

- Web-based application, no software needed (SAAS)
- Inspires collaboration and expression
- Supports numerous file and image formats (photos, videos, PDF, Office Suite)
- Draw on top of the media as you record comments
- A VoiceThread is easy to embed in any website.

Benefits of “Software as a Service”

- Web-based (can be accessed anywhere, anytime)
- No software to download and install
- Management and upgrades by VoiceThread
- All data is backed up by VoiceThread

What can I do with it?

- Create collaborative, slides shows that hold images, documents and videos.
- Comment in multiple forms (telephone, webcam, microphone, text or file upload)
- Hold group discussions on one page

The screenshot shows the Voicethread website interface. At the top, there are navigation buttons for "Browse", "Create", and "MyVoice", and the "voicethread" logo. Below these are three large feature tiles: "Bellwork" with a bell icon, "Venn Diagrams" with two overlapping circles, and "Going and Coming" with a bus icon. A secondary navigation bar includes "Presentations", "Classroom", "Featured", "Travel", "StoryTelling", and "Family". A news snippet from December 7th, 2007, is visible. The main content area features three columns: "Create" (from Images, Docs, Videos), "Comment" (by Voice, Text, Audio file, Webcam) with a "New!" label and a red arrow pointing to "phone", and "Share." (Transforming media into collaborative spaces). A "Learn more." button is located at the bottom right of the main content area. The footer contains links for "Home", "About", "Blog", "Help", "Partners", and "Contact Us", along with the copyright notice "Copyright © VoiceThread 2007-08 · Terms of Use".
